

Volunteer Driver Screening

An important feature of volunteer recruitment is the development of screening criteria for volunteer driver selection. Screening criteria generally include:

1. basic functions of the position
2. the ability to perform the tasks required

Basic tools for screening should include, at the very least:

1. a position description
2. application forms
3. face-to-face interview
4. reference check
5. driver licensing, insurance, and safety check

A criminal background check may also be advisable when volunteers are assigned to drive riders.
